P1	Making sketch for the prototype build plan	2026-10-01	AC

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

A bar 20 wide x 5 tall x 209.4 long; print two, lying flat.

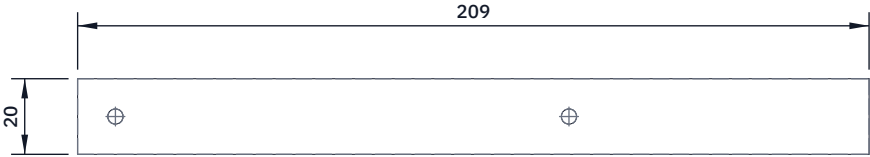

Two holes 4.0 mm, 4 deep, in the top face on the centre line; press in M3 heat-set inserts. Inner length: 10 and 130 from the fan-end end.

Outer length: 120.6 and 195.6 from the fan-end end.

Fit: under the shelf, 58 to 78 back from the front edge, held by M3 screws down through the shelf.

It stands 1 mm above the top of the pack and stops it lifting.

Check: the pack slides under it with light hand pressure.
